

**The Corporation of the Municipality of Wawa  
Staff Monthly Report**

**Office of Infrastructure Services**

<b>Prepared For:</b> Corporate Planning	<b>Report No.:</b> DB 2022 - 02
<b>Agenda Date:</b> May 3, 2022	<b>File No.:</b> 9.40.4

**Preamble**

The following report is based on items concerning the Municipality of Wawa that have been directed by the Infrastructure Services Department. This information is for the months of March and April.

**Operations**

During the month of March the snowblower made its way through the town widening the narrow streets and removing as much snow as possible before the spring thaw ends access to the Municipal snow dump.

April was warmer which brought out the beginning of the sweeper season. As the roads and sidewalks bared off staff was able to begin to sweep what was available. The occasional snow fall slowed things for a day or two and then back to melting.

Also with the spring thaw brought out the pothole season and half loading on gravel roadways. The grader started maintenance on the gravel roads and the crews have begun filling potholes with cold patch, it's a temporary fix but can be done numerous times until a hot box can be purchased.

**Water & Sewer**

A few minor happenings in April for the Water Department, firstly was the high chlorine incident which was a good learning experience for all involved and then a water main break in the front of the Royal bank. The rest of the time was eaten up with routine sampling, building and distribution maintenance with a few frozen service lines thrown in.

### Capital 2022

Most Capital projects are on hold until the winter season releases its firm grasp on the area allowing spring to melt the everlasting supply of snow that the residents of Wawa saw this year.

The landfill is slowly moving forward with incorporating recommendations into the final Design and Operations report, along with Surface Water Management Plan and System Design. It's in the Ministry's court as to when we can proceed.

### Infrastructure Services Forecasted Schedule

In the coming weeks and months, Infrastructure services will be focusing on :

- Sweeping, flushing roads and sidewalks
- Putting out garbage cans and benches
- Gravel road maintenance and calcium
- Starting of line painting
- Working on getting capital projects underway
